For your child's safety and health

WARNING!

- Always use this product with adult supervision. Accidents have occurred when babies have been left alone with drinking equipment due to the baby falling or if the product has disassembled.
- Never use spouts as a soother.
- Continuous and prolonged sucking of fluids will cause tooth decay. Tooth decay in young children can occur even when non-sweetened fluids are used. This can occur if the baby is allowed to use the cup for long periods through the day and particularly through the night, when saliva flow is reduced or if it is used as a soother.
- Always check food temperature before feeding. Heating in a microwave oven may produce localised high temperatures. Take extra care when microwave heating. Always stir heated food to ensure even heat distribution and test the temperature before serving.

Cleaning and Sterilisation

- Before first use, clean the product.
- Clean before each use.
- Always wash the product immediately after use.
- Wash in warm soapy water and rinse in clean water or use a dishwasher (Top shelf only). Do not clean with solvents or harsh chemicals.
- Do not allow product to come into contact with oil based foods (e.g. oil/tomato based sauces) as staining will occur.
- Suitable for sterilisation by steam (electric and microwave), boiling or cold water tablet/liquid solution.

Storage and Use

- Inspect before each use and pull the feeding spout in all directions. Throw away at the first signs of damage or weakness. Do not store or leave in direct sunlight or near a source of heat.
- Do not store with or allow to come into contact with solvents or harsh chemicals.
- Not suitable for use in a conventional oven or a combination microwave oven with the grill feature switched on.
- Keep all components not in use out of reach of children.
- **Not suitable for hot or fizzy (carbonated) drinks.**
