

tommee tippee® explora®

advance-flo
technology™

*active
straw*

instructions to disassemble

1. Unscrew the lid and pop up the straw. Remove the clear tube

2. Remove the white retainer by pushing on the lever

3. Pull the straw valve by lifting one side then the other and pull downward through the lid until you feel resistance

4. Do not remove the straw valve entirely just pull down to hang just below the lid

NOW wash all parts in warm soapy water and rinse thoroughly or use a dishwasher, top shelf only

instructions to assemble

1. Align the white retainer with the base of the straw valve and join together

2. Push down on the button on the soft side so that it pops through the hard side

3. Pull the straw until the base of the valve clicks into the correct place

4. This is what the underside of your lid should look like

5. Attach the clear tube to the white retainer
