valve instructions

instructions to disassemble

1. Unscrew the lid and remove the valve by pushing on the lever

2. This will pop the valve out of the lid

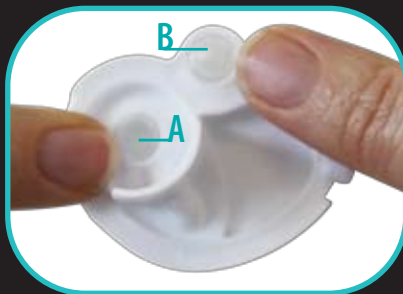

3. Separate the soft and hard parts of the valve

NOW wash all parts in warm soapy water and rinse thoroughly or use a dishwasher, top shelf only

instructions to assemble

1. Align the soft and hard part of the valve

2. Ensure parts A and B are pushed through the hard side of the valve

3. Place the valve back into the lid

4. Push until the sides lock into place

5. Please make sure you see a cut in the dome of part B

6. Please make sure the cut is able to open on the dome so that this can vent any air
